

FOR IMMEDIATE RELEASE

## GTM AWARDED SAS-70 TYPE II CERTIFICATION

**CLIFTON PARK, NY – (November 13, 2008)** – GTM Payroll Services Inc., the proven expert in payroll services for businesses and household employers of all sizes, announced that it has successfully been awarded Type II Certification for SAS-70 Compliance.

In a Type II report, the independent auditor will express an opinion as to whether the organization's description of its controls presents fairly the relevant aspects of the organization's controls that had been placed in operation as of the Type I certification; whether the controls were suitable to achieve specified objectives; and whether the controls that were operating with effectiveness to provide assurance that the objectives were achieved.

As noted by Matt Lindemann, CPA, CFE, Audit Partner at Wojeski & Co. CPAs, P.C., when a SAS-70 report for an organization is provided, it allows CPAs and Financial Advisors ..."to assess the risk associated with contracting or recommending the organization at a lower level."

SAS 70 Type II certification reflects the accuracy of GTM's documentation in relation to its corporate policies and the extent to which they govern the company's day-to-day management, personnel controls, infrastructure and security controls. A Type II report not only includes the service organization's description of controls as outlined in a SAS-70 Type I audit, but also covers detailed testing of the service organization's controls over a minimum six month period. The company again voluntarily submitted to an extensive audit for Type II Certification eligibility.

The certification process required an independent auditor examining GTM's day-to-day procedures to ensure the company performs as documented. Discussing the certification, CEO of GTM Payroll Services, Guy Maddalone commented, "We are extremely pleased to receive this certification. It underscores that at GTM we accurately document our procedures; and that these procedures further support the delivery of our services to our wide-ranging client base, and that they can hold up under the scrutiny of an independent auditor each and every day."

"Our operational and related teams deserve a tremendous amount of credit for assuring that GTM's operations meet and exceed the rigorous standards and expectations of the SAS 70 Type II principles," added Todd Maddalone, Vice President of Operations at GTM. "It is one more way we provide our customers with the most reliable service possible."

The audit of GTM Payroll Services Inc. was completed by a nationally-recognized, independent auditing firm with extensive experience in examining payroll service bureau organizations, for control objectives and activities throughout the organization, as they relate to processes and procedures effective September 2008. A formal report including the auditor's opinion ("Service Auditor's Report") was issued to the organization's management at the conclusion of the SAS-70 Type II examination.
